We will also test the solility Pilots - Steps towards mess Registers (ESBRs) - in which we not SDMX-ML data files from national actice in using EGR data and own

Description of work (max 4-5 sentences)

In 2018 it is planned to establish new automatic procedures for importing administrative data to SBR and to revise several existing ones in order to raise quality of SBR data. Mainly it is referred to more frequently updating of bankruptcies and cessations of units and better use of Crafts Register's data and tax data.

IV. Main challenges

Please list main challenges (maximum 3) with respect to development, maintenance and use of your statistical business register. Also, please classify them according to the categories within each drop-down list.

1. Main challenge 1	(Category)
Work on development and maintenance of SBR	5. Maintenance
Description of the challenge	
Development and maintenance od SBR is done with very scarce resoneeds for further developments are increasing, but it is not supported way to solve that problem, we see in bigger using of administrative so SBR and development of tools for replacing manual work.	with enough resources. So, the only
2. Main challenge 2	(Category)
Including statistical unit "enterprise" in SBR	3. Units
Description of the challenge	
As the work for defining automatic procedures for forming enterprise transform "legal unit data" received from administrative source to enterprise transform.	
3. Main challenge 3	(Category)
	Select one
Description of the challenge
